Keeping websites handy can be the ultimate productivity hack, Here are some of the best websites I use to make my life easier.

Let's take a look at them one by one.

1. Random Image via API

[Link](#)

The most powerful photo engine in the world. The Unsplash API is a modern JSON API that surfaces all of the info you'll need to build any experience for your users

Random search term

Using any of the above formats, you can narrow the selection of a random photo even further by supplying a list of comma-separated search terms at the end of the URL.

If you'd like to limit the results to only those photos included in our curated collections, simply add `featured` at the end of the URL.

Parameters

`https://source.unsplash.com/featured/?{KEYWORD},{KEYWORD}`

* Optionally, to specify a size, place it after the base URL.

Search with size

`https://source.unsplash.com/1600x900/?nature,water`

The screenshot shows a search bar with "nature" and a grid of 12 nature-related images including landscapes, waterfalls, and trees.
